

Rohan Bhatia

UI UX Designer

[Portfolio](#) | [Email](#) | [LinkedIn](#)

Leap.club (Freelance)

● Visual Designer (August 2024 – May 2025)

- Created and refined the official logo and branding guidelines to establish a consistent and recognizable visual identity.
- Designed high-impact social media graphics and reels that increased brand visibility and follower engagement.
- Produced professional event posters and banners, ensuring all physical and digital touchpoints aligned with the brand's aesthetic.
- Developed diverse brand visuals that effectively communicated the company's mission across multiple marketing channels.
- Managed the end-to-end design process for both print and digital assets, maintaining high quality and brand alignment.

Johnson & Johnson (Full Time)

● UI/UX Designer (January 2024 – June 2024)

- Simplified employee workflows by adding Gen AI models to automate small, repetitive tasks within internal software.
- Worked on J&J Internal Code Review platform to help developers work more efficiently.
- Created and updated high-quality visuals and layouts based on specific project requirements and brand standards.
- Partnered with diverse teams to turn complex internal needs into user-friendly design solutions.
- Driven innovation within Internal IUX Projects by identifying ways to make existing company tools faster and easier to use.

PSI Tech Center (Full Time)

● UI/UX Designer (June 2023 – December 2023)

- Designed and developed user interfaces for AI-driven healthcare platform **Parchaa**, focusing on making complex medical data easy for professionals to navigate.
- Built a specialized AI content censorship program **Choice.ai** for OTT platforms to automate and improve the safety of digital media.
- Created and maintained user-friendly interfaces and components for the company's internal design system to ensure visual consistency.
- Conducted comprehensive user research and usability testing to identify pain points and improve the overall product experience.
- Collaborated with technical teams to bridge the gap between complex AI functionality and intuitive user design.

Kafqa (Full Time)

● UI/UX & Graphic Designer (April 2022 – March 2023)

- Worked on the product website while constantly updating it as per users feedback to identify pain points and implement functional website improvements.
- Conducted user surveys and performed secondary research to better understand students and parents need and refine product strategy.
- Created visual designs and social media posters that effectively communicated the brand's message, ensuring a consistent look and feel across the platforms.
- Developed design assets for **marketing campaigns** that directly contributed to the success of D2C.
