

Rohan Bhatia

Product & Visual Designer

rohan.bhatia2@gmail.com | +91 82874 85828 | Portfolio | LinkedIn | Behance | India

Summary

Product and visual designer creating clear, high-craft digital experiences across enterprise tools, AI-enabled healthcare products, internal developer workflows, responsive websites, brand systems, and campaign design. Blends UX research, information architecture, prototyping, accessibility-minded interaction design, and visual storytelling to turn ambiguous briefs into polished, shippable product and brand experiences.

Professional Experience

Leap.club

Visual Designer, Freelance | August 2024 - May 2025

- Evolved Leap.club's brand identity through logo refinement, visual guidelines, and repeatable campaign design patterns for social, events, and marketing.
- Produced social content, reels, event posters, and banners with a unified visual language across fast-moving digital and offline touchpoints.
- Managed end-to-end execution from brief to final assets, balancing brand consistency, speed, and polished visual craft across multiple formats.

Johnson & Johnson

UI/UX Designer, Full Time | January 2024 - June 2024

- Designed AI-assisted internal workflows by integrating GenAI features that reduced repetitive effort and made employee tasks easier to complete.
- Improved UX for an internal code review platform, helping developers move through review tasks with clearer flows and stronger interface feedback.
- Collaborated with product, engineering, and internal stakeholders to translate complex enterprise requirements into usable product interfaces.

PSI Tech Center

UI/UX Designer, Full Time | June 2023 - December 2023

- Designed product interfaces for Parchaa, an AI-driven healthcare platform, translating complex medical data into clearer navigation and task flows.
- Built UX flows for Choice.ai, an AI content moderation tool for OTT platforms, supporting safer digital media review workflows.
- Contributed reusable components to the internal design system, improving UX consistency and design-dev handoff quality.
- Ran user research and usability testing to identify pain points, validate design decisions, and improve the product experience.

Kafqa

UI/UX & Graphic Designer, Full Time | April 2022 - March 2023

- Iterated the product website using user feedback, research insights, and functional UX improvements for students and parents.
- Used surveys and secondary research to understand audience needs and guide product and website decisions.
- Designed social media and campaign assets that extended a consistent brand experience across customer-facing channels.

Education & Certifications

B.A. English Honors, IGNOU | July 2022 - June 2025

Google UX Design Certificate, Coursera
